THE HUMAN RESOURCE MANAGEMENT PROCESS

- To ensure an organization has qualified people to perform all the work, specific HRM activities need to be done.
- There are eight activities in the HRM process that are split into three major groups:
 1. Ensuring that competent employees are identified and selected
 2. Providing employees with up-to-date knowledge and skills
 3. Ensuring that the organization retains competent and high-performing employees

HRM PROCESS

HUMAN RESOURCE PLANNING

- **Human resource planning:** ensuring that the organization has the right number and kinds of capable people in the right places and at the right times
- Two steps:
 - Assessing current human resources
 - Meeting future HR needs

CURRENT ASSESSMENT

- **Job analysis:** an assessment that defines jobs and the behaviors necessary to perform them
- **Job description (position description):** a written statement that describes a job
- **Job specifications:** a written statement of the minimum qualifications a person must possess to perform a given job successfully

MEETING FUTURE HR NEEDS

- Future HR needs are determined by the organization's mission, goals, and strategies.

RECRUITMENT AND DECRUITMENT

- **Recruitment:** locating, identifying, and attracting capable applicants
- **Decruitment:** reducing an organization's workforce

SELECTION

- **Selection:** screening job applicants to ensure that the most appropriate candidates are hired.
- Selection involves predicting which applicants will be successful if hired.
- Selection is successful if you select a job applicant who turns out to be good employee, or if you reject one that will be a bad employee.

VALIDITY AND RELIABILITY

- A valid selection device is characterized by a proven relationship between the selection device and some relevant criterion.
- A reliable selection device indicates that it measures the same thing consistently.

ORIENTATION

- **Orientation:** introducing a new employee to his or her job and the organization
- **Work unit orientation:** familiarizes employees with the goal of the work unit and their specific job
- **Organization orientation:** informs employees about the company's goals, history, philosophy, procedures, and rules

TYPES OF TRAINING

- Onboarding or new hire
- Interpersonal skills
- Profession or industry-specific
- Executive development
- Management or supervisory
- Information technology or systems
- Customer service
- Mandatory compliance (e.g., cybersecurity, sexual harassment)

DEVELOPING EMPLOYEES

- Whereas training programs focus on developing skills for your current job, employee development activities are focused on preparing you for your future roles within the company.
- Microsoft provides a range of development activities, as outlined in Exhibit 11-10 on the next slide.

PERFORMANCE FEEDBACK

- Performance appraisal/evaluation: the practice of providing job feedback to an employee that may be used to improve performance and for compensation and promotion decisions.
- Many companies have learned that the annual review process is not timely enough to make an impact.
- Immediate feedback and smaller steps toward improvement are more realistic and can lead more quickly to better performance.

ELECTRONIC PERFORMANCE MONITORING

- **Electronic performance monitoring:** the use of electronic instruments to collect, store, analyze, and report individual or group performance.
- This technology is being widely used in call centers where supervisors can continually track and analyze an employee's workflow in real time.
- Electronic monitoring systems can continually collect information on performance metrics like the average call handling time, total number of calls handled, and time on breaks.

COMPENSATION AND BENEFITS

- **Skill-based pay:** a pay system that rewards employees for the job skills they can demonstrate
- **Variable pay:** a pay system in which an individual's compensation is contingent on performance

WHAT DETERMINES PAY AND BENEFITS

OTHER PAY FACTORS

- Bonuses vs. Annual Pay Raises
- Pay Secrecy vs. Transparency
- Benefit Options
